

# Inside Secure - Hiring

- Inside Secure provides software, silicon IP, tools and know-how for secure transactions, content, applications and communications. Our software protection tools are already in widespread commercial use to protect Windows, Android, iOS and Linux applications.
- We are currently hiring to complement our existing WhiteBox development team.
  - WhiteBox Security Analyst
    - ❖ Side channel attack development
    - ❖ Reverse engineering
    - ❖ Research into security countermeasures and product improvements
- Position is permanent and based in Glasgow, UK.
- Please contact us for more information.
